EDUCATION

University Of South Florida

May 2026

Bachelor of Science in Computer Science, GPA : 3.86 /4.0

Tampa, FL

- Relevant Coursework: GenAI, Natural Language Processing, Data Structures & Algorithms, Operating Systems
- Awards: USF Green and Gold Presidential Scholarship (\$12,000/year), College of Engineering Dean's List

WORK EXPERIENCE

Givelify

May 2025 - Aug 2025

Software Engineer Intern (Backend)

Dallas, TX

- Enhanced platform search accuracy by **15%** by developing an **AWS Lambda microservice** for data enrichment and configuring **Elasticsearch** for precise query filtering.
- **Cut external API costs** by **75%** by designing an efficient **python** pipeline with fallback logic and **Redis caching**.
- Streamlined cloud infrastructure provisioning and microservice deployment using **Terraform**, **Docker**, GitHub Actions **CI/CD** under Agile workflows.
- Secured consistent data persistence by implementing the **MySQL** migrations with PHP/Laravel.

USF Bellini College of Engineering

Aug 2024 - Aug 2025

AI Research Intern

Tampa, FL

- Published an **NLP** paper on multi-agent **LLM** frameworks modeling belief-driven reasoning and decision behaviors.
- Automated **100+** experimental runs by developing object-oriented Python scripts that standardized LLM evaluations.

Acculytix

May 2024 - Aug 2024

Software Engineer Intern

Hyderabad, India

- Built a **React.js** dashboard to monitor 50+ daily external API calls, reducing manual log checks.
- Implemented **CI/CD** with **GitHub Actions** for automated unit testing, boosting code reliability.

University of South Florida

Jan 2024 - May 2026

Building Manager

Tampa, FL

- Built a web application that improved efficiency of staff by **40%** and **enhanced** real time support with a RAG chatbot.
- Supervised a team of **10+** co-workers, managing **100+** events monthly to ensure seamless execution.

PROJECTS

Building Management Software | Python, FastAPI, LangChain, PostgreSQL, TypeScript, Docker, AWS EC2

Demo

- Built staff-support web app using Python (FastAPI), TypeScript and PostgreSQL saving staff **3+** hours/day.
- Integrated an AI chatbot with **RAG** (Gemini AI, Quadrant), enabling scalable real-time staff query handling.
- Automated asynchronous ingestion of 3+ years of documents, ensuring concurrency and eliminating manual uploads.

Stock Portfolio Analyzer | Python, Fast API, ReactJS, DynamoDB, Docker

- Developed a stock portfolio analyzer with Fast API and React JS, delivering personalized portfolio rebalancing insights.
- Optimized stock analysis pipeline with **RAG** (Gemini AI + Quadrant vector store), enabling market-aware suggestions.
- Deployed on **AWS EC2** with **DynamoDB** and **Redis** caching, cutting average portfolio query latency by **~30%**.

ECG Signal Classification with PEFT | Python, PyTorch, PEFT Fine tuning (Adapters, LoRA)

- Fine-tuned ECG-FM on a **65k**-sample ECG dataset using PEFT methods (**Adapters** and **LoRA**) in PyTorch, achieving competitive precision scores for arrhythmia detection.
- Reduced trainable parameters by 98% through PEFT methods while maintaining up to 81% accuracy.

LeetCode Notetaking Extension | JavaScript, Gemini AI API, Chrome Extensions API, Notion API

- Automated note-taking for LeetCode problems, reducing documentation time from around **3** minutes to **5** seconds.

TECHNICAL SKILLS

Languages: Python, C, C++, Go, C#, Java, JavaScript, TypeScript, SQL

Cloud & Tools: AWS (EC2/S3/DynamoDB/Lambda), Docker, Kubernetes, Git, SQLAlchemy, Jenkins, Terraform

Frameworks: Spring Boot, React.js, Angular, Node.js, Django, Flask, FastAPI, REST API, MCP

Databases: SQL (MySQL, Postgres, SQLite), NoSQL (Redis, MongoDB)

AI/ML Technologies: PyTorch, TensorFlow, Pandas, NumPy, RAG, LLMs, scikit-learn, LoRA fine-tuning

LEADERSHIP

Software Engineer – Association of Computing Machinery | Tampa, FL

Oct 2022 – May 2024

- Led a team of 2 to develop an election website using ReactJS for **200+** members, achieving **95%** user satisfaction.
